

Meeting learning needs

ACCORDING to the world education rankings by the Organisation for Economic Co-operation and Development, the Canadian education system is consistently ranked as one of the world's best education system that prepares students in literacy, numeracy and science.

Sunway International School (SIS) is among the few schools in the Asian region to offer the Ontario (Canada) Ministry of Education Secondary School curriculum in Malaysia.

Upon completion of Grade 11 at SIS, students can continue with Grade 12 to earn the Ontario Secondary School Diploma (OSSD), a qualification acknowledged by top-tier universities the world over.

Additionally, the Ontario education qualifies students to pursue other pre-university foundation programmes such as the Cambridge GCE A-Levels and the Australian Matriculation in any field of study at educational institutions across the world.

More importantly, SIS stresses its core principle – that all Ontario credit courses are taught by fully certified Canadian professionals licensed by the Ontario College of Teachers (OCT).

Fully certified teachers

This accreditation qualifies teachers to teach in the Ontario school systems and distinguishes SIS teachers as professionals whose teaching practices are guided and informed by internationally benchmarked standards and practices.

They design lessons and classroom strategies with an individual student's learning needs in mind, preparing them with both academic study skills and real-world knowledge applications.

Sunway International School keeps individual students' learning needs in mind.

Latest information technology used

The Ontario education makes strategic use of the latest information technology gadgets.

High school students in Grade 9 to 11 utilise individual laptops to develop their skills of independent study, analysis and research while online resources and multimedia content are regular resources in the students' school life.

The entirely Wi-Fi-enabled school comprises air-conditioned classrooms that are equipped with interactive touch-screen whiteboards, modern laboratories, a spacious cafeteria, a multi-purpose indoor gymnasium, a resource centre stocked with wide range of educational resources and a nurse's station.

■ SIS open day will be held on April 19. For more information, call 03-7491 8070 or visit www.sis.sunway.edu.my/openday
